## **Introduction**

### **Intended Use**

This thermometer is intended for home use and the measurement of human body temperature in people of all ages. This thermometer takes temperatures in seconds by measuring the heat generated by the ear canal/ on the forehead.

### **Type of Use/ Reuse**

Multiple patient multiple use

### **Intended User**

The Patient is an intended operator.

Patient selection criteria: Handicapped persons and children are the exception of handicapped persons and children need assistance by another person to use the device.

### **Contraindication:**

1. The ear is infected with otitis or suppuration.
2. The ear canal treated with ear drops or other medications.
3. Blood or drainage in ear canal.
4. Face and/or ear deformities
5. Forehead is scarred or compromised tissues
6. Patient' s skin is on certain medication of measurement site.

## Important Information before Use

When using this product, please be sure to follow all the notes listed below. Any action against these notices may cause injury or affect the accuracy.

1. Do not disassemble, repair, or remodel the thermometer.
2. Be sure to clean the thermometer lens each time after usage.
3. Avoid direct finger contact with the lens.
4. **WARNING:** No modification of this equipment is allowed.
5. It is recommended that user may take 3 temperatures. If they are different, use the highest reading.
6. Do not expose the thermometer to extreme temperature, very high humidity, or direct sunlight.
7. Avoid extreme shock or dropping the device.
8. Before the measurement, patients and thermometer should stay in steady state room condition for at least 30 minutes.
9. Avoid measuring temperature in 30 minutes after exercise, bathing, or returning from outdoor.
10. To protect the environment, dispose of empty batteries at appropriate collection sites according to national or local regulations.
11. Please use the thermometer solely for its intended purpose.
12. There are no absolute body temperature standards. Keep reliable records of your personal temperature to serve as a reference for judging a fever.
13. Under any circumstances, the temperature taking result is **ONLY** for reference. Before taking any medical action, please consult your physician.
14. The thermometer is calibrated at the time of manufacture. If at any

time you question the accuracy of temperature measurements, please contact an authorized distributor for sending calibration services, additional cost may apply for return shipping fee.

15.  CAUTION - Avoid potential allergic reactions, please avoid the front of scanner in direct contact to patient's wound.
16.  CAUTION - Please keep this device away from pets, pests, and children.
17.  CAUTION: Please keep away from children and pets, because small parts may be inhaled or swallowed.
18. If you would require any assistance during setting up, using or maintaining, please contact the manufacturer.
19. Avoid using the device near an operating cell phone or microwave oven.
20. If any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user is established.
21. Neonatal under 6 months, the ear canal is still under development, very narrow so the temperature of the eardrum often cannot be recorded and the result displayed is often too low.
22. Make sure the ear canal is clean not blocked by earwax.

## Product Identification

- 1 Forehead/ Cover Cap
- 2 Display
- 3 LED LIGHT
- 4 Power/Ear Measure button
- 5 SET button
- 6 Memory button
- 7 Forehead Measure button
- 8 Battery Compartment Lid
- 9 LED Flashlight

## Description of LCD Display

	Date
	Time
	Measurement in progress
	Temperatuer unit Celcius
	Temperatuer unit Fahrenheit
	Degree of temperature
	Sound symbol
	Low battery symbol
	Memory symbol and sets of records
	Object measurement
	Ear measurement
	Forehead measurement

## Battery Installation

When the battery is low, the battery warning symbol appears . It is still possible to measure temperature. The batteries shall be replaced shortly. When both the battery symbol flashes  and “Lo” appears in the display, the batteries must be replaced immediately. If the batteries are drained, then the thermometer will switch off automatically.

### NOTE:

- It is recommended to remove the batteries if the unit will not be used for an extended period of time.
- Please properly dispose of the batteries away from small children and heat.
- Batteries must be disposed of in accordance with local environmental and institutional policies.
- It is recommended not to use rechargeable, unqualified or different spec of batteries as it may damage the device or cause circuit shortcut.
- Dispose of used batteries in accordance with the applicable legal regulations. Never dispose of batteries in the normal household waste.

### STEPS to change battery

1. Open the battery case by sliding off the cover on the back of the unit.
2. Remove used battery.
3. Replace with 2 x 1.5V LR03(AAA) alkaline batteries in designated area. (check for the right polarity before replace with the new battery)
4. Slide the cover back on. Unit is ready for immediate use

## Setting °C/°F and Date/Time

When the thermometer is used for the first time and each time the batteries are changed, the date and time are displayed in the format 1-1 00:00 during the basic set-up (after the self-test). Set each of the following settings in turn: unit in which the temperature will be displayed, date and time. To set the device, proceed in stages:

Unit – year – month – day – hours – minutes

After install batteries (first time use), the device performs a brief self-test: all elements of the display are shown for approx. 1 second. Following a successful self-test, the device emits two short beeps. In Standby mode, the date and time are shown and "--" is displayed.

### 1. Changing from Fahrenheit to Celsius

- (1) Press the "SET" button for more than 3 seconds to set the °C/ °F.
- (2) Press the "Memory" button to confirm entry.

### 2. Date/Time Function

- (1) Press the "SET" button to change.
- (2) Press the "Memory" button to confirm entry.
- (3) The blinking Date, followed by Year, Hour and Minute will display. Repeat steps (1) and (2) to adjust the date/time setting.
- (4) Your unit is now ready to take a reading, or press the "Memory" button to turn the unit off.
- (5) After this process, the thermometer shows the word OFF in the display and switches off automatically.

## Measuring Body Temperature in the Ear

1. Remove the Cover cap..
2. Press the Power/Measure button for 1 second to switch the thermometer on. All screen data will display on screen. Then the measurement mode flashes on screen. If the icon shows forehead mode, please press Power/Measure button again to change to ear mode. Then wait for beep sound to let you know the appliance is ready and followed by last temperature reading.
3. Make sure that the sensor tip and also the ear canal are clean. As the ear canal is slightly curved, you have to pull the ear slightly up and backwards before inserting the sensor tip. This is important so that the sensor tip can be pointed directly at the eardrum.
4. Insert the sensor tip carefully and press the Power button for 1 second.
5. The end of the measuring time is signaled with beep sound and the measured value appears on the display.

## Measuring Body Temperature on the Forehead

1. The cap should be in position on the probe nozzle.
2. Press the Power/Measure button. All screen data will display on screen. Then the measurement mode flashes on screen. If the icon shows ear mode, please press the Power/Measure button again to change to forehead mode. Then wait for beep sound to let you know the appliance is ready and followed by last temperature reading.
3. When the beep sounds to let you know the appliance is ready, press the Power/Measure button and maintain pressure.
4. Place the probe on your temple. Slide the probe across your forehead to the other temple, and then release pressure on button to stop temperature taking. You' ll hear a beep and your temperature will come up on the screen.

**Note:** Forehead temperature may be affected by external climatic conditions. If in doubt, do not hesitate to take your ear temperature.

## Measuring Object/ Liquid Temperature

1. Press the "Forehead Measure" button or "Power/ Ear Measure" button for 1 second to switch the thermometer on. Following a successful self-test, the device emits two short beeps.
2. Then press the "Memory" and "SET" buttons simultaneously for 3 seconds to switch to the "Object Scan Mode" .

The  symbol appears in the display.

3. Point the sensor tip towards the object or liquid (maintaining a distance of 3 cm), then take one press on "Forehead Measure" button or "Power/ Ear Measure" button to take a measurement (never immerse in liquids).
4. After the measurement process is complete, there comes a short beep and the measured value appears on the display.
5. Please note that the displayed temperature is the measured and not the adapted surface temperature. It is not the same as the temperature.
6. To switch back to the thermometer mode, press the "Memory" and "SET" buttons simultaneously for 3 seconds until the "" symbol disappears and there is a short beep.

## Memory Function

1. The device can recall up to 30 measurements
2. Press the “Memory” button. The first reading displayed is the latest measurement stored in memory.
3. Continue to press the “Memory” button to view the next previously stored measurement.

## Cleaning and Disinfecting

For home use device disinfection, 75% alcohol (available in the pharmacy) can be used.

- Probe and Tip  
Clean the probe and tip before and after each measurement.
- Thermometer:  
Use a soft, dry cloth to clean thermometer body. Never use abrasive cleaning agents, thinners or benzene for cleaning. Do not scratch the surface of the probe lens or the display. Do not expose the thermometer to extreme temperatures, humidity, direct sunlight, or shock.

## Error Codes

When a malfunction or incorrect temperature measurement occurs, an error message will appear as described below.

LCD Display	Cause	Solution
H <sub>i</sub>	The temperature measured is higher than 43°C (109.4°F)	Operate the thermometer only between the specified temperature ranges. If necessary, clean the sensor tip. In the event of a repeated error message, contact your retailer or Customer Services.
Lo	The temperature measured is lower than 34°C (93.2°F)	
Err	The operating temperature is not in the range 15°C~40°C (59°F~104°F)	Operate the thermometer only between the specified temperature ranges.

## Trouble Shootings

Trouble	Probable Case	Recommended Action
Failed to power on.	Batteries are drained.	Replace with a new battery
	Batteries are not correctly aligned with terminals.	Reinsert batteries correctly.
	The thermometer is damaged.	Contact your retailer or Customer Services.
Low battery symbol appears.	Low battery.	Replace with a new battery as soon as practical
	In colder temperature batteries have weaker electrical charges.	Warm up the batteries or use the device in a warmer setting.
The measurement is abnormal or if there is any doubt on the measured result	Incorrect measure position.	Reposition the probe point the eardrum or rescan the forehead.
	The measuring distance is too far.	Move the probe closer to the measuring site.
	The measuring is hampered by earwax , hair, oil, sweat, etc.	Remove obstructions from ear or forehead.
	The lens of probe is dirty.	Clean the lens according to <i>cleaning and disinfecting</i> .
	You have just come from extreme temperatures environment.	Stay in steady state room at least for 30 minutes.
	The thermometer has been stored in a cold	Put the thermometer in steady state room at

Trouble	Probable Case	Recommended Action
	room or exposed to direct sunlight.	least for 30 minutes.
	Measurement was taken in incorrect mode.	Switch to proper mode.
Power switches off automatically.	System design.	Push the power button again.
	Batteries are drained.	Replace with a new battery
	The thermometer is damaged.	Contact your retailer or Customer Services.

## Technical Specification

- Range of Measurement :  
Human Body: 34°C – 43°C (93.2°F – 109.4°F)
- Measuring accuracy :  
Human Body: 34°C – 43°C (93.2°F – 109.4°F) ±0.2°C (0.4°F)
- Operating environment :  
15°C – 40°C (59°F – 104°F)  
with relative humidity 15% to 95% (non-condensing)  
Atmospheric Pressure: 700~1060 hPa
- Storage/ Transportation environment :  
-25°C – 55°C (-13°F ~+131°F)  
with relative humidity 15% to 95% (non-condensing)  
Atmospheric Pressure: 700~1060 hPa
- Display resolution : 0.1°C
- Power supply: 2 x 1.5V LR03(AAA) alkaline
- Auto switch-off in 60 seconds without operation 
- Memory: 30 sets
- Weight : approx. 65g (without batteries)
- Dimensions : approx. 131.3 x 38 x 30.7 mm (L×W×H)
- Shelf Life : 3 years
- Battery Operation Time: About 90 minutes (Depends on different brand of batteries.)
- For Customer Service

To obtain further service please contact AViTA Corp. for the address of the repair location. Enclose the Proof of Purchase. Include \$10.00 USD for the return shipping and handling. Include a letter, with your name, address, phone number, and description of the specific problem. Pack the product carefully to prevent damage in transit. Because of possible loss in transit, we recommend insuring the product with return receipt requested.

## EMC Tables

<p><b>TS45</b> is intended for use in the electromagnetic environment specified below. The customer or the user of <b>TS45</b> must make sure that it is used in such an environment.</p>			
<p>Guidance and manufacturer' s declaration - Electromagnetic emissions</p>			
Phenomenon	Professional healthcare facility environment a)	HOME HEALTHCARE ENVIRONMENT a)	
Conducted and radiated RF MISSIONS	CISPR 11 Group 1 Class A (Not BLE Function) Group 2 Class A (With BLE Function)	CISPR 11 Group 1 Class B (Not BLE Function) Group 2 Class B (With BLE Function)	
Harmonic distortion	Not applicable (Note: Power by Battery or DC Input) Only the AC input needs to be tested		
Voltage fluctuations and flickering	Not applicable (Note: Power by Battery or DC Input) Only the AC input needs to be tested		
<p>a) The equipment is suitable for use in Home Health Environments and Professional Health Care Environments limited to patient rooms and respiratory treatment facilities in hospital or clinics. The more restrictive acceptance limits of Group 1 Class B (CISPR 11) have been considered and applied. The equipment is suitable for use in the mentioned environments when directly connected to the Public Mains Network.</p> <p>b) The test is not applicable in this environment unless the ME EQUIPMENT and ME SYSTEM used will be connected to the PUBLIC MAINS NETWORK and the power input is otherwise within the scope of the Basic EMC standard.</p>			
<p>Guidance and manufacturer' s declaration - Electromagnetic immunity - Enclosure port</p>			
Phenomenon	Basic EMC standard or test method	Immunity test levels	
		Professional healthcare facility environment	HOME HEALTHCARE ENVIRONMENT
ELECTROSTATIC DISCHARGE	IEC 61000-4-2	± 8kV contact ± 2 kV, ±4kV ±, ±8 kV, ±15 kV air	
Radiated RF EM fields	IEC 61000-4-3	a)	10 V/m b) 80MHz - 2.7 GHz 80% AM at 1kHz

Proximity fields from RF wireless communications equipment	IEC 61000-4-3	<p>COMPLIANT</p> <p>NOTE: Further information about distances to be maintained between portable and mobile RF communications equipment (transmitters) and the <b>TS45</b> can be requested from supplier using the contact information provided in this manual. However, it is advisable to keep the electromechanical aerosol equipment at an adequate distance of, at least, 0.5 m from mobile phones or other RF communications transmitters to minimise possible interference.</p>
RATED power frequency magnetic fields.	IEC 61000-4-8	<p>30 A/m c) 50 Hz or 60 Hz</p>
<p>a) The equipment is suitable for use in Home Health Environments and Professional Health Care Environments limited to patient rooms and respiratory treatment facilities in hospital or clinics. The more restrictive IMMUNITY acceptance limits have been considered and applied.</p> <p>b) Before modulation is applied.</p> <p>c) This test level assumes a minimum distance of at least 15 cm between the ME EQUIPMENT or ME SYSTEM and sources of power frequency magnetic fields.</p>		

## Explanation of Symbols
